Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 1-13 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 6-7, claim 8 line 8-9 and claim 10 line 1-3 "bypass valve operatively coupling at least one said motor selectively either with said pressure source or said hydraulic transformer outlet" is wrong, since the hydraulic transformer outlet is always coupled to the motor (by line between outlet 36 and inlet 40).

In claim 9 line 5-7 and claim 13 line 7-9 "each said hydraulic motor being fluidly coupled in a parallel manner with at least one of said hydraulic transformer outlet and said pressure source" is wrong, since the second hydraulic motor (52) is not connected to the outlet (36) of the transformer (18). The two motors are connected in parallel with the pressure source only.

In claim 11 line 1-2 "one of said...motors being directly coupled with said pressure source" is wrong, since there is a valve (58) between the motor (52) and the pressure source (16).

Claims not specifically mentioned are indefinite, since they depend from one of the above claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9 and 13 are provisionally rejected under the judicially created doctrine of double patenting over claim 8 of copending Application No. 09/870,921. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the claimed limitations of the instant invention are included in claim 8 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 13 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Glas. Fig. 9 shows two motors (205, 205') connected to the transformer.

Claims 1-3 and 8-13 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Satzler.

Claims 1-10 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Kux.
